

THE ASAM CRITERIA

for Managed Care

American Society of Addiction Medicine

For more than 50 years, the American Society of Addiction Medicine (ASAM) and its more than 3,000 physicians and associated professionals have been leading the way in addiction treatment through research, education and the establishment of treatment criteria.

The ASAM Criteria

The ASAM Criteria is **the leading resource** for appropriate treatment services and level of care placement decisions for patients. The criteria are used nationwide and are mandated for use in more than 30 states.

In addition to providers of care, an increasing number of managed care companies and utilization management entities use *The ASAM Criteria* to guide level of care decisions.

THE ASAM CRITERIA

Resources for Managed Care

The ASAM Criteria Book

Used nationwide and mandated for use in more than 30 states, *The ASAM Criteria* is the leading resource for appropriate treatment services and level of care placement decisions for patients. The book will help you gain an understanding of the foundation of the criteria by learning what goes into a multidimensional assessment and what defines each level of care.

ASAM Series eTraining Courses

Learn about the criteria from the only eTraining series endorsed by ASAM. Hosted by Dr. David Mee-Lee, Chief Editor of *The ASAM Criteria*, these engaging and interactive courses teach essential skills in assessment, placement and effective service planning.

Prefer live training? We provide that, too.

Web-based Version for Managed Care

Text from *The ASAM Criteria* book is also available online. This web-based version of the criteria was developed specifically for managed care users. Easily search for keywords and copy and paste specific text for evidence when supporting and/or denying claims.
